SUBJECT INDEX VOLUME 10 (1989)

N-acylethyleneimine copolymers, 5
adriamycin, 51, 65
anti-inflammatory agents, 167
anti-Thy 1.2 antibodies, 37
antileukemic activity *in vivo*, 51, 97
antimicrobial activity, 119
antitumor activity *in vitro*, 75
antitumor activity *in vivo*, 65, 75

biodegradable, 293
blood–brain barrier permeability, 27
body distribution, 5, 37

carboxymethyl dextran, 75
charge and hydrophobicity effects, 27
chemical gate, 195
chromophore, 107
cis-platinum, 75
compacts, 245
conjugate, 107
controlled release, 205
controlled release of drug, 261
controlled release tablet, 219
copoly (L-lactic acid/δ-valerolactone), 293

[^{125}I]daunomycin, 37
dental analgesia, 183
diclofenac, 219
disintegration, 245
disulfide bond cleavage, 89
drug delivery system, 293
drug permeability, 251, 261, 273
drug release, 189, 237

enzymatic degradation, 17
enzyme activity, 145
enzyme stability, 131
ethylcellulose, 283

Fc receptor targeting, 89
food interactions, 205
four-electrode system, 157

galactosamine targeting, 51
gel permeation chromatography, 17
glucose, 195
glucose oxidase, 195
gradient maxtrix system, 283

hairless mouse skin, 157
hydrocortisone, 189
hydrolytic drug release, 97
hydrophilic membranes, 237
N-(2-hydroxypropyl)methacrylamide copolymers, 27, 37, 51

insulin release, 195
intravascular half-life, 145
in vitro–in vivo correlation, 219
iontophoresis, 157

lignocaine, 183

methotrexate, 89
microencapsulation, 167
microporous polypropylene powder, 205
microspheres, 167, 177
mitomycin C, 97
modified dextrans, 97, 131
modified enzymes, 131
molecular weight effects, 27
molecular weight effects *in vivo*, 5
monoclonal antibody, 107

nitrogen mustard derivative of estradiol-17β, 293

oil–water microemulsions, 237
oral absorption, 205
oral controlled release, 283
oxprenolol HCl, 205

papaya proteinases, 131
partition coefficients, 237
pasty-type copolymer, 293
penicillinase degradation, 119
performance evaluation, 219
pharmacokinetics, 177
photochemotherapy, 107
photosensitization, 107
poly(amino acids), 75
poly(L-aspartic acid), 65
polydimethylsiloxane–poly(ethylene oxide) graft copolymers, 261
polyelectrolyte, 195
poly(ethylene glycol)modification, 145
poly(glutamic acid), 107
poly(*N*-hydroxyalkylglutamines), 17
poly(D-lysine), 89
polymer matrix, 189
polymer structure–drug permeability relationships, 251
polymeric β-lactam antibiotics, 119
poly(methyl methacrylate), 177

poly(vinyl methyl ether/maleic anhydride) esters, 189
porous systems, 245
pressure-sensitive adhesive, 273
proteolytic enzymes, 17
pyran copolymer, 65, 75

rat prostate, 293
ring-opening polymerization, 5

silicone–organic block copolymers, 251
silicone–organic graft copolymers, 261, 273
skin permeability increase, 157
sodium laurylsulphate, 205
soluble polymeric drug carriers, 5, 17, 27, 37, 51, 65, 75, 89, 97, 119, 131, 145
solvent evaporation method, 167
solvent flow, 157
spraying technique, 283
steroid permeability, 251
superoxide dismutase, 145
sustained release, 177
swelling, 245

T-cell targeting, 37
tablets, 245
theophylline, 177
timolol, 189
topical toxicology, 183
transdermal controlled drug delivery, 273

vinyl pyrrolidone copolymers, 119
Voltarol®, 219

zero order, 283

AUTHOR INDEX VOLUME 10 (1989)

Abramova, V.V., 131
Andrade, J., 225
Armstrong, B.K., 27
Arnon, R., 75
Asano, M., 293

Banci, L., 145
Bilej, M., 37
Bodmeier, R., 167
